Inspiration gives rise to creation

Hans-Wilhelm Seitz, the designer of many successful porcelain shapes, manages time and again to transform the things which inspire him into extraordinary creations – and this is also evident with the new CHARACTER structure line.

The novel, modern and lively band structure on the steep rims of the items succeeds in combining atmosphere, emotiveness and decorative elements in a reserved and natural way.

CHARACTER thus gives your culinary creations in the truest sense of the word a new, unmistakable character.

Despite all of the originality of the design, CHARACTER blends in perfectly both as china on a dinner table and as an item on a traditional coffee table. The combination of structured flat parts and smooth hollow sections creates a special visual appeal which is also accentuated by the reflections of light on the relief. What is more, this range allows you to combine different items as your mood takes you.

Unity through diversity

The CHARACTER range of plates creates a new vibe on every stylishly set dinner table. The design's clear style, which emphasises the serviceability, functionality and aesthetic appeal of an item of porcelain used in everyday situations, enjoys a subtle, but unmistakable character thanks to the band structure which appears to be arranged at random. At the same time, thanks to their steep rims, the generous proportions of the plates offer you plenty of free scope to present your dishes successfully.

A versatile character

The CHARACTER range comprises flat and deep plates, salad bowls and serving dishes. The shape fits in perfectly with the stylish ambience of a table set using traditional and trendy themes. Regardless of whether you just use the structure plates on your table or view CHARACTER as the ideal complement to existing smooth series, CHARACTER will always symbolise your personal style – a preference for something special rather than just the same old things.

Full range of emotions

Just as multifaceted as CHARACTER itself are the new decorative patterns and colours which emotively emphasise the versatility of the line. The decorative elements give the band structure a distinctly individual touch. They perfectly mirror the diversity of the modern age here – from strictly graphical statements and discreetly floral conceptions right through to retro-modern imagery. The colour worlds play equally convincingly with fresh shades of blue and green as they do with modern pastel shades – and give a stylish edge to your tableware.
