## **DECLARATION OF COMPLIANCE FOR MATERIALS AND OBJECTS INTENDED TO COME INTO CONTACT WITH FOOD PRODUCTS**

**Document n. E01/2022**

1) It is hereby declared that the material:

- PA/PE various thickness and goffrato from 70 to 200 MY

**Supplied by Byvac srl**

to pack food classified under the ref. 06.03.

Satisfy the requirements of the following European Community legislation:

- Regulation 1935/2004/EC
- Regulation 1895/2005/EC
- Regulation UE 10/2011
- Directive 94/62/CE
- Regulation 2023/2006/EC

and the following Italian legislation:

- Ministerial Decree 21/03/1973 and subsequent updates and modifications
- DPR 777/82 and subsequent updates and modifications

2) The afore mentioned material is made of the following:

- Polyamide
- Polyethylene
- Polyethylene (layer in contact with food)

3) It is declared that

- the material can be only used for food packaging for which no global and specific migration tests are expected.
- the material does not contain substances that are limited by the aforementioned legislations and respects the pertaining to overall migration under the following test conditions:
- the material contains substances subjected to restrictions in the aforementioned legislations. Materials respect limits pertaining to overall migration and specific restrictions under the following testing conditions:

Simulant: A - Distilled Water (10 days @ 40°C)

Simulant: B - Acetic Acid 3% (10 days @ 40°C)

Simulant: D - Rectified Olive Oil (10 days @ 40°C)

Simulant(s) and test referring to Directive 82/711/EEC and 85/572/EEC and subsequent updates and modifications as well as to Decree of 22 July 1998 - no. 338).

(\*) Group of products referring to the classes indicated by European Directive 85/572/EEC confirmed with Ministerial Decree of 26 April 1993, no. 22 and subsequent updates and modifications.)

- Overall migration limit as well as other specific restrictions to which monomers and/or other additives, contained in the material, could be subjected are respected as per aforementioned conditions. This affirmation is supported by analytical tests or on the basis of calculations relative to the migration of substances carried out in accordance with Directives 82/711/EEC, 85/572/EEC and 97/48/CE as well as Ministerial Decree of 21 March 1973. Calculations were carried out on the assumed ratio of 1 kg of food coming into contact with 6 dm<sup>2</sup> of product.
- Material could contain substances regulated by Directives 89/107/EEC and 88/388/EEC and by Ministerial Decrees of 27 February 1996 - no. 209, 27 November 1996 - no. 684 and 23 July 2003 (such substances are also known as "dual use" additives).  
According to experimental data and/or theoretic calculations, such substances are in keeping with the specifications of art. 5 bis, Directive 2002/72/EC and art. 9, paragraph 2, letter c) of Ministerial Decree of 21 March 1973.  
User of the material intended to come into contact with foodstuffs have the responsibility of notifying the company penning the document of any restrictions deriving from the compositional ingredients (such as additives and flavouring) of the food product to be packaged.

This certification is drawn up in accordance with the afore mentioned legislation and it is intended for:

- Industrial or business usage of the material specified herein is subject to ascertainment of the material conformity to legislations in force as well as to the technological suitability of the same for its intended purpose. This statement is valid for a maximum period of 24 months.
- This certification is valid as of the date specified below and it will be replaced when significant changes in the production of the material will cause changes of some essential requirements referring to the conformity or when legislations specified in point 1) will be modified and updated in such manner as to require a new evaluation of the compliance.
- The material for contact with food must be kept for a period not exceeding 24 months, possibly packaged in a dry place and protected from light and heat sources. The compliance of the material means limited to the conditions of storage, maintenance and use given the particular characteristics of the product, the conditions for the use or coding professional. If you change the product, its composition or its intended use, as in the case of mutation of the conditions of product use, the recipient of this statement must verify the compatibility container / content which is responsible. This statement meets the regulatory requirements in EU and non-European countries that recognize its validity. It is your responsibility to communicate any differences laws strictly to those applicable in the EU.
