Declaration of Conformity for Filter Sheets

Filtrox Carlson Ltd is a producer of filter sheets for applications in the food, beverage and chemical industries. These filter sheets are manufactured from specially selected raw materials such as purified and bleached cellulose, inorganic natural filter aids, such as kieselguhr, activated carbon, perlite and polyamidoamine resin as wet strength agent.

The filter sheets comply with the requirements of Regulation 1935/2004/EC of the European Parliament on materials and articles intended to come into contact with food, BfR Recommendation Ch XXXVI, FDA CFR 21 176.170 and US Food and Chemical Codex standards, as applicable.

All products are made according to the rules of Quality Management System EN ISO 9001 and GMP Directive (EC) No 2023/2006.

Additional information

Filtrox Carlson filter sheets are KOSHER certified. The sheets contain no live organisms or animal based extracts and therefore can also be used for HALAL certified foodstuffs.

We certify that Carlson filter sheets do not contain any of the following materials, either within the raw material composition or added as processing aids:

Allergens (as listed in Regulation (EU) No 1169/2011)

Genetically Modified Organisms

Alcohol

Solvents

VOC (Volatile Organic Chlorides)

Melamine formaldehyde

Silicone

Glass fibre

Asbestos

Nanomaterials

All wood pulps used in Carlson filter sheets come from sustainable resources and are FSC certified
